	91	261
Partial differential equations	99	239
Penalty function methods	95	29
Periodic problems	95	157
Periodic solution	95	127
Perturbed polynomials system	98	99
Phase-lag	95	1
Piecewise polynomial quadrature	95	101
Piecewise polynomial product integration rules	91	219
Piecewise rational approximation	99	195
Plancherel-Rotach formulae	99	77
Point estimation	91	123
Poisson and Biharmonic equation	94	153
Polygamma functions	100	191
Polygamma function	100	201
Polylogarithms	98	245
Polynomial and non-polynomial potentials	95	83
Polynomial approximation	99	319
	99	463
Polynomial roots	96	117
Polynomial zeros	91	123
Positive-semi-definite matrix	91	31
Power method with shift	96	77
Precondition	100	207
Preconditioned iterative method	100	1
Preconditioner	94	133
Prescribed poles	94	1
Primary: 81Q05	93	45

Probabilistic error bounds	94	69
Probability with fixed marginals	96	149
Psi function	98	245
	99	167
Ptak-like conditions	94	13
q-Hermite polynomials	99	67
q-Krawtchouk polynomials	99	275
q-Laguerre polynomials	99	67
q-Meixner polynomials	99	275
q-orthogonal polynomials	99	67
Quadrature formulae	92	59
Quadrature weight	95	101
Quasi-stationary distribution	99	387
Quasilinear elliptic boundary value problem	96	13
Radius of attraction	98	179
Random coupon collector problem	93	95
Random walk	99	387
Random walks	99	287
Random-walk polynomials	99	387
Random-walk measure	99	387
Rank-deficient least-squares problem	100	1
Rate of convergence	91	191
Rational functions	99	299
Rational space	94	1
Rationality	94	23
Rayleigh quotient gradient system	96	77
Reaction–diffusion systems	97	99
Realization functional	99	463
Rectangular quadrature rule	92	97
Recurrence formulas	99	3
Recurrence relations	96	1
	99	275
Recurrence formulas	99	299
Recurrence relations	98	305
Recursive constructions	98	1
Regular splitting	94	133
Regularization	93	75
Relaxation method	93	35
Relaxation technique	93	13
Reliable estimation method	95	139
Reproducing kernels	99	401
Reproducing kernel spaces	99	413

Residual error indicators	100	173
Residual scaling techniques	100	41
Residual-based a posteriori error estimators	96	99
Richardson iteration	92	109
Riemann zeta function	98	245
Rodrigues type formula	99	239
Root-finding methods	98	311
Runge–Kutta scheme	100	77
Runge–Kutta methods	100	93
SOR method	100	207
Saalschütz' summation formula	99	449
Saddle points	100	121
Saddle-point problem	100	207
Schrödinger equation	91	47
	95	83
